TOXICOLOGY

VOLUME CONTENTS

Volume 69 (1991)

The cerium-induced liver injury and oxidative drug metabolism in DBA/2 and C57BL/6 mice **(The cerium-induced morphological and enzymatic changes are markedly different in both mouse strains)**
by P. Arvela, H. Kraul, F. Stenbäck and O. Pelkonen Oulu, Finland) 1–9

Effects of organic solvent vehicles on the viability and morphology of isolated perfused porcine skin **(Vehicle effects need to be studied carefully in any model of cutaneous research)**
by J.R. King and N.A. Monteiro-Riviere (Raleigh, NC) 11–26

Neonatal exposure to 3,3′,4,4′-tetrachlorobiphenyl: changes in spontaneous behaviour and cholinergic muscarinic receptors in the adult mouse **(Locomotional behaviour is affected while there seems to be only a small effect on central receptors)**
by P. Eriksson, U. Lundkvist and A. Fredriksson (Uppsala, Sweden) 27–34

Dermal intoxication of mice with bis(2-chloroethyl)sulphide and the protective effect of flavonoids **(Flavonoids moderately protect against dermally applied sulphur mustard)**
by R. Vijayaraghavan, K. Sugendran, S.C. Pant, K. Husain and R.C. Malhotra (Gwalior, India) 35–42

Regional effects on the cerebral concentration of noradrenaline, serotonin and dopamine in suckling rats after a single dose of lindane **(The weak convulsive lindane increases monoaminergic activity age- and region-relatedly)**
by S. Rivera, C. Sanfeliu, C. Suñol and E. Rodríguez-Ferré (Barcelona, Spain) 43–54

Lack of induction of hepatic DNA damage on long-term administration of peroxisome proliferators in male F-344 rats **(DNA changes were only found in tumor-bearing livers)**
by H. Tamura, T. Iida, T. Watanabe and T. Suga (Tokyo, Japan) 55–62

Cadmium toxicity: unique cytoprotective properties of alpha tocopheryl succinate in hepatocytes **(Unesterified alpha tocopherol does not protect hepatocytes against Cd injury, but alpha tocopherol succinate protects against injury and lipid peroxidation)**
by M.W. Fariss (Richmond, VA) 63–77

Reactive oxygen species and non-peroxidative mechanisms of cocaine-induced cytotoxicity in rat hepatocyte cultures **(Iron dependent peroxidation reactions lead to cell injury)**
by C.R. Göldlin and U.A. Boelsterli (Schwerzenbach, Switzerland) 79–91

Protective effects of dextran sulfate and polyvinyl sulfate against acute toxicity of paraquat in mice **(The protective agents reduce gastrointestinal transit time and inhibit paraquat absorption)**
by S. Kojima, Y. Miyazaki, T. Honda, M. Kiyozumi, H. Shimada and T. Funakoshi (Kumamoto, Japan) 93–99

Cytoprotective effect of reduced glutathione in arsenical-induced endothelial cell injury **(Intracellular GSH and PG I 2 protect cultured cells against the cytotoxicity of trivalent arsenicals)**
by W.-C. Chang, S.-H. Chen, H.-L. Wu, G.-Y. Shi, S. Murota and I. Morita (Taiwan, China) and Tokyo, Japan) 101–110

Effect of in vitro treatment of rat hepatocytes with selenium, and/or cadmium on cell viability, glucose output and cellular glutathione **(Selenium protects partially hepatocytes against the toxic effects of Cd on hepatocytes)**
by R.R. Bell, V.K. Nonavinakere, M.R.I. Soliman and J.L. Early II (Tallahassee, FL)..... 111–119

Distal nephrotoxicity of cisplatin demonstrated by urinary kallikrein excretion and morphological study in rats **(Urinary kallikrein is a useful marker for distal tubular damage)**
by G. Bompart, C. Orfila and J.-P. Girolami (Toulouse, France) 121–132

Effects of acute nickel toxicity upon plasma and liver metal homeostasis as a function of sex **(The injection of nickel seems to affect the tissue concentrations of other metals and metal-related proteins)**
by J. Cartañá, L. Arola and A. Mas (Tarragona, Spain) 133–141

Induction of metallothionein in mouse liver by valproic acid **(While valproic acid induces hepatic metallothionein, Cu and Zn levels do not change)**
by M. Kaji and H. Mikawa (Kyoto, Japan) 143–149

Acute effects of the D-isomer of *S*-(1,2-dichlorovinyl)cysteine on renal function and ultrastructure in the pentobarbital-anesthetized dog: Site-specific toxicity involving the S_1 and S_2 cells of the proximal tubule **(Although slightly less potent, the D-isomer produces similar morphologic and functional signs of kidney damage as does the L-isomer)**
by M.E. Krejci, R.E. Ridgewell and D.A. Koechel (Toledo, OH) 151–164

Acute effects of the Bowman–Birk protease inhibitor in mice **(Demonstration of protease inhibition in lung in vivo)**
by V.I.C. Oreffo, P.C. Billings, A.R. Kennedy and H. Witschi (Davis, CA and Philadelphia, PA) 165–176

Nature of Cd and Hg effects on epithelial amino acid transport in vivo and role of chelators **(Hg produces an immediate inhibition of amino acid transport in the kidneys, whereas after Cd, effects develop more slowly)**
by E.C. Foulkes (Cincinnati, OH) 177–185

6-Alkyl-1,3,8-trichlorodibenzofurans as antiestrogens in female Sprague–Dawley rats **(A correlation between antiestrogenic potencies and Ah receptor binding was found)**
by B. Astroff and S. Safe (College Station, TX) 187–197

Effect of benzyl viologen on the fatty acid composition of rat liver **(Chronic treatment lowers body weight, increases hepatic lipids and changes their patterns)**
by V. Ruiz-Gutierrez, F.J.G. Muriana and F.J. Quintero (Sevilla, Spain) 199–207

Draining lymph node cell activation in guinea pigs: Comparisons with the murine local lymph node assay **(Skin sensitizing chemicals stimulate thymidine uptake by lymph node cells not only in mice but also in guinea pigs)**
by T. Maurer and I. Kimber (Basel, Switzerland and Macclesfield, U.K.) 209–218

Review Article

A review of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin-induced changes in immunocompetence: 1991 update **(An analysis of available data and of future research needs)**
by M.P. Holsapple, N.K. Snyder, S.C. Wood and D.L. Morris (Richmond, VA) 219–255

Influence of chlordimeform on alpha-adrenergic receptor-associated mechanisms of hormonal regulation in the rat: Pituitary and adrenocortical secretion **(Chlordimeform appears to interfere with a regulatory signal mediated by alpha-adrenergic receptor-associated activity)**
by T.E. Stoker, J.M. Goldman, R.L. Cooper and W.K. McElroy (Research Triangle Park, NC) 257–268

The effect of age of exposure on lead-induced testicular toxicity **(Prepubertal rats may be less sensitive to lead-induced testicular toxicity than are older animals)**
by R.Z. Sokol and N. Berman (Torrance, CA) 269–278

Hepatic glutathione suppression by the α-adrenoreceptor stimulating agents phenylephrine and clonidine **(Adrenergic agents may disrupt hepatic glutathione homeostasis and impair detoxification of certain compounds)**
by R.D. Harbison, R.C. James and S.M. Roberts (Gainesville, FL) 279–290

Reproductive and developmental toxicity studies of pyridostigmine bromide in rats **(Fertility or reproductive performance were not affected and no drug effects were observed in the offspring)**
by B.S. Levine and R.M. Parker (Chicago, IL and Jefferson, AR) 291–300

A new method for delivering alkanes to mammalian cells: preparation and preliminary characterization of an inclusion complex between β-cyclodextrin and pristane (2,6,10,14-tetramethylpentadecane) **(Validation of the methodology used to deliver alkanes into cells in vitro)**
by S. Janz and E. Shacter (Bethesda, MD) 301–315

An explanation for strain and sex differences in renal uptake of methylmercury in mice **(Differences in renal uptake of methylmercury correlate with hepatic or plasma glutathione levels)**
by T. Tanaka, A. Naganuma, K. Kobayashi and N. Imura (Tokyo, Japan) 317–329

Organophosphate poisoning: a method to test therapeutic effects of oximes other than acetylcholinesterase reactivation in the rat **(The non-enzyme-reactivating oxime HI-6 improves neuromuscular transmission possiby by interference with acetylcholine receptors)**
by R.W. Busker, J.J. Zijlstra, H.J. van der Wiel, B.P.C. Melchers and H.P.M. van Helden (Rijswijk, The Netherlands) 331–344

Contents of journals relating to Toxicology 345–348

Subject Index Volume 69 349–352

Author Index Volume 69 353–354
